***Specification***

The specification has been objected due to the following reason:

On pages 3-4, 12 and 18, the specification describes the following chemical formula, " C(S)R<sup>25</sup> R<sup>26</sup> ". This expression is improper due to the extra bond formation around the carbon atom. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 23, and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, the chemical formula " $C(S)R^{25}R^{26}$ " is recited. The expression is vague and indefinite because the expression is improper due to the extra bond formation around the carbon atom. Appropriate correction is required.

In claim 23, the phrase "1,2 bis(di-t-pentyl-phosphino)-o-xylene (also known as 1,2 bis(di-t-pentyl-phosphinomethyl)benzene)" is recited. The chemical terminology inside the parenthesis can be confusing because it is redundant. The examiner recommends to cancel the chemical terminology inside the parenthesis. Therefore, an appropriate correction is required.
